#### **DETAILED ACTION**

## Specification

 Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes." etc.

2. The abstract of the disclosure is objected to because of the words "means" and "said". Correction is required. See MPEP § 608.01(b).

#### Claim Objections

- 3. Claim 1 is objected to because of the following informalities:
  - Claim 1 Line 1, change "A locking means for an over-centre fastener" to -A
    locking means on an over-centre fastener-.

Appropriate correction is required.

Application/Control Number: 10/533,016 Page 3

Art Unit: 3676

## Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

• The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

5. Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being

indefinite for failing to particularly point out and distinctly claim the subject matter

which applicant regards as the invention.

Claim 1 recites "a locking means for an over-centre fastener". It is unclear if the

applicant is actually claiming the combination of the locking means with the structure

of the over-centre fastener or just the locking means.

If the claims are just directed to the locking means, the applicant is reminded that

the limitations of the fastener would be considered as the intended use of the locking

means, with no patentable weight. If the claims are directed to the locking means

combined with the structure of the fastener, then the applicant is required to properly

claim the invention (see claim objection above).

Therefore, in order to continue with the examination, the claims would be given a

broad interpretation.

## Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form

the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United

States.

Application/Control Number: 10/533,016

Art Unit: 3676

7. Claims 1,3 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by US Pat No 4,243,255 to Hornak.

Regarding claim 1, Hornak discloses a locking means that comprises a spring (79) and an abutment means (66). The spring has one end attached to an object and an opposite, movable end forming engagement means (the end engaged to 78). The opposed end is formed with guide means (surface of 67) guiding the movement of the spring.

As to claim 3, Hornak illustrates that the spring is a wire spring.

As to claim 5, Hornak discloses that the guide means (67) comprises a portion of the spring bent (at 81).

## Claim Rejections - 35 USC § 103

- 8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- Claims 2 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over
   US Pat No 4,243,255 to Hornak in view of US Pat No 4,652,030 to Streett.

Hornak fails to disclose that the spring is a leaf spring that is bent. Hornak discloses that the spring is a wire spring that is bent at one end.

Streett teaches that it is well known in the art to provide a device with either a leaf spring (20) or a wire spring (14).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the locking means described by Hornak with a leaf spring instead of a wire spring, as taught by Streett, because it would be considered as a design consideration within the art since it would perform the same.

#### Conclusion

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Carlos Lugo whose telephone number is 571-272-7058. The examiner can normally be reached on 10-7pm EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brian Glessner can be reached on 571-272-6843. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
